The Key is Partnerships

Patients are at the center of everything Clinerion does. But no-one can do it alone. In support of faster patient access to medicines and improved health outcomes for patients, Clinerion is proud to collaborate with an ecosystem of private and public partners who are leaders in their field. We partner with researchers and clinicians at hospitals, patient advocacy groups, patient registries, local and regional authorities (e.g. Ministries of Health), regulators, pharmaceutical companies, and CROs. These last two months, we have been proud to announce some important new partnerships.

New hospital partner Szpital Specjalistyczny w Brzozowie, Poland

Szpital Specjalistyczny w Brzozowie, (the Specialist Hospital in Brzozów), Poland, specializes in oncology, hematology and cardiology. The hospital has 485 beds and electronic hospital records for more than 250,000 patients. Each specialization has its own Primary Investigator and research team and the hospital runs roughly 30 trials per year.

New hospital partner The University of Debrecen, Hungary

Clinerion expands into Hungary by adding the University of Debrecen to its international patient network. The university offers clinical trial study sites with expertise in a variety of therapeutic areas. The University of Debrecen, Clinical Center, has a strong reputation for clinical research, currently running over 360 trials, with 113 starting in 2018, alone. The University is a "Global Prime Site" for IQVIA, a "Premier Site" for Sanofi, and has partnership with several CROs, pharma companies (incl. Pfizer, Novartis, ICON, Parexel).

New partner Citeline (Informa Pharma Intelligence)

Citeline, part of the Informa Pharma Intelligence family, and Clinerion have announced a partnership providing clinical researchers with a more holistic method for making more evidence-based decisions during their clinical trial processes. The partnership simplifies and strengthens matchmaking between clinical researchers and qualified patients. Collaboration between two companies leads to more informed decisions for clinical researchers, grounded in real-world evidence.

Realising International Data Access Through Data Collaborations (European Pharmaceutical Contractor)

Publication date: February 12, 2019

European Pharmaceutical Contractor asked for our thoughts on how integration / consolidation of patient data from many sources and repositories can be achieved to support real-world evidence, market access, or clinical trial patient search.

"Enabling access to real-world data on a global scale is daunting, but surmountable by applying a new collaboration model with innovative technologies for consolidation of data."

Clinerion is Expanding!

New Team Member:
Fernando Dejtjar
Project Management Director

Fernando is a Pharmacist and an MBA with more than fifteen years' experience working with Global

Clinical Trials Projects. He started his career as a Technical Director in a pharmaceutical company in Argentina, joined IQVIA (ex Quintiles) as a Regulatory Affairs Manager, moved to Fisher Clinical Services as a Facility Manager, then returned to IQVIA as a Global Central Laboratory Director for Latin America.

"I hope to move Clinerion to the next level, executing successful projects, assisting in the growth of the site & patient network and giving the possibility to extend the base of clients, always keeping in mind that reducing timelines with disruptive technology will bring better possibilities to discover new medicines and treatments for patients in order to improve human health."

**New Team Member:
Sébastien Wischlen**

Associate Director, Site & Patient Networks

With seven years' experience in Clinical Study Coordination and Clinical Operations (Monitoring, Start-Up and Feasibility) for Covance, Novartis, Amgen and IQVIA, Sébastien can clearly recognize and convey the added value Clinerion delivers to patients, hospitals and pharma alike.

"I strive for the expansion of the Clinerion network across the globe in order to bring the right trial to the right patient and effectuate clinical research where it is needed most. Also being a registered nurse, I am convinced that patient centricity and close collaboration with the hospitals and clinics is key to our success."

**New Team Member:
Alexandre Vanobberghen**
System Integration Project Manager

As a solution-minded engineer at heart, Alexandre has applied his systemic approaches in the IT world for the last twelve years to satisfy customers and stakeholders of the Financial and Public Health sectors.

"Clinerion provides me with a great opportunity to combine and draw from my skills sets to deliver integration projects with the expected quality and help take our footprint to the next level."

Clinerion Wants to Expand More!

Call for Student Master's Thesis

The purpose of this Master's Thesis is to create a technical design for an application based on implementation of Clinerion's pending patent on patient-centric trial recruitment. This approach focusses on the patient, who receives information about clinical trials to which they match the criteria, which are being run in the hospital they are in.
